

BS-1200

Description:

BS-1200 door sheet shrink tunnel designed based on PE shrink packaging machine. It owns higher loading capacity due to its larger shrink tunnel and more powerful driving motor. The equipment adopts several high-power internal circulating fans to ensure there is sufficient hot wind evenly circulating in shrink tunnel, which guarantees the packing effect of relatively big object.

Features:

1. Electronic speed-regulating motor is adopted to ensure wide speed regulating range.
2. Additionally, enclosed hot wind internal circulating mechanism is used inside the shrink tunnel for good packing effect.
3. The equipment is featured by its novel design, good appearance, easy operation and convenient maintenance, applied to all kinds of shrink films.

Application:

BS-1200 door sheet shrink tunnel is used to shrink pack goods, such as door sheet, glass sheet, board etc.

Parameters:

	BS-1200
Voltage(V/Hz)	3 Phase 380/50
Power (kw)	27
Loading (kg)	100
Speed (m/min)	0~10
Max. Packing Size (L×W)(mm)	1200×200
Film Used	PE, PVC, POF
External Dimension (L×W×H)(mm)	3115×1400×1100
Net Weight (kg)	300
