

**Description:**

KZ-2 elec-melt strapping machine is suitable for both machine-used or hand-used plastic strap (thickness 0.7-1.8mm, width 12-13mm.). After bonding, the tensile resistance of hand-used strap is 15-40kgs, and 40-120kgs for machine-used strap.

**Features:**

The machine adopts electronic temperature control, characterized by high sensitivity and energy-saving.

**Application:**

The weight of KZ-2 electric-melt strapping machine is only 5kgs, which is portable and can be used in any circumstance.
